12TH - 14TH FEB 2019
CTICC CAPE TOWN

PREPARE FOR THE REVOLUTION

AFRICA'S ROLE IN THE 4th INDUSTRIAL REVOLUTION

THE FOURTH INDUSTRIAL REVOLUTION (INDUSTRY 4.0) IS HAPPENING RIGHT NOW, AS WE SPEAK

We currently stand on the brink of a technological revolution that will fundamentally alter the way we live, work and relate to one another. In its scale, scope and complexity, the transformation will be unlike anything humankind has experienced before. We do not yet know how it will unfold, but one thing is clear: the response to it must be well-planned, integrated and comprehensive, involving all stakeholders, from the public and private sectors, to academia and civil society.

It is essential that Africa's developing economies plan for the enormous effect the 4th Industrial Revolution will make to their national development plans.

This conference and expo is aimed squarely at industries involved in delivering African country development goals.

PREPARE FOR THE REVOLUTION

The speed of current breakthroughs has no historical precedent. When compared with previous industrial revolutions, the fourth is evolving at an exponential rather than a linear pace. Moreover, it is disrupting almost every industry in every country. And the breadth and depth of these changes herald the transformation of entire systems of production, management, and governance.

The possibilities of billions of people connected by mobile devices, with unprecedented processing power, storage capacity, and access to knowledge, are unlimited. And these possibilities will be multiplied by: emerging technology breakthroughs in fields such as artificial intelligence, robotics, the internet of things, autonomous vehicles, 3-d printing, nanotechnology, biotechnology, materials science, energy storage, and quantum computing

PREPARE FOR THE REVOLUTION

Africa Tech Week consists of a technology conference, expo and awards ceremony with high-level industry sector-related breakaways. The sector-related breakaway sessions will have a panel of world-leading authorities on the 4th Industrial Revolution's effect on that specific industry sector. The expert panel will include policy implications, challenges and opportunities. It will also include industry's leaders from the private sector, civil society

Some of the sectors will include

- Education
- Financial services and banking
- Telecommunications
- Manufacturing
- Infrastructure,
- Transport
- Engineering
- Automotive
- Agriculture
- Aquaculture
- All forms of energy generation
- Water storage and delivery
- Chemical industry
- Financial Sector

Some of these Industries and their service providers will be exponentially transformed by the 4th Industrial Revolution:

The conference is designed to alert, educate and connect African countries to the growing national and international opportunities created by the world's 4th Industrial Revolution. The expo will present and demonstrate the worlds ground breaking and innovative technologies.

The four-day event will focus on the technical drivers and their related industry spheres. Speakers and Exhibitors at Africa Tech Week will include:

- World leading technology experts
- Academics
- International and African principle architects of the 4th Industrial Revolution
- Futurists
- Innovative manufacturing companies
- Ministers and African Policy makers

THE 1st INDUSTRIAL REVOLUTION

USED WATER AND STEAM POWER TO MECHANIZE PRODUCTION.

2nd

USED ELECTRIC POWER TO CREATE MASS PRODUCTION.

3rd

USED ELECTRONICS & INFORMATION TECHNOLOGY TO AUTOMATE PRODUCTION.

4th

Now a fourth industrial revolution is building on the third. The "digital revolution" it is characterised by a fusion of technologies that is blurring the lines between the physical, digital and biological spheres.

There are three reasons why today's transformations represent not merely a prolongation of the third industrial revolution but rather the arrival of a fourth and distinct one: velocity, scope and systems impact.
